TELESCOPIC STEP LADDERS

- The Telescopic ladder is the latest innovation in ladder technology. It is perfectly suited to all needs in business and the home.
- Its easily adjustable height from less than a meter to nearly 4 meters (and anywhere in between) makes for an incredibly innovative tool, minimizing storage space and maximising efficiency.
- Like all our products, it has met the stringent European EN131 quality standards and is rated to 150KG while remaining light enough to be carried in one hand.
- As we move into a time where space, safety and speed are considered more important than ever this ladder is quickly proving itself to be a 'must have' tool.

CODE	LADDER	WEIGHT	HEIGHT COLLAPSED / EXTENDED
ILT106	SINGLE SIDED TELESCOPIC	11.5 KG	0.94 M / 3.8 M
